PROFILE

4th-Semester Informatics Engineering student at Esa Unggul University, with an educational background in Software Engineering. Possesses over 2 years of technical work experience managing IT infrastructure, hardware maintenance, and software development using PHP and Python. Skilled in complex technical troubleshooting and multimedia production operations.

WORK EXPERIENCE

Fullstack Developer, Clems Grafter Creative

Februari 2026 - Mei 2026 | Kuningan Barat

- Developed the back-end of an ERP application and ensured code quality met established standards.
- Built and engineered responsive front-end user interfaces using modern web technologies, significantly improving user experience and system navigation.
- Conducted rigorous application testing and debugging phases to identify technical bottlenecks, ensuring code quality met strict established standards.

General Affair IT Support, Talent-Tech

Juli 2024 - Januari 2026 | Jakarta

- Responsible for the maintenance, repair, and installation of various electronic devices and computer systems.
- Successfully identified and repaired over 20 hardware issues monthly with a 100% success rate.
- Managed technical inventory and ensured all devices were functioning optimally for operational needs.

Developer Assistant, Dama Integra Solusindo

November 2023 - Juni 2024 | Kuningan Barat

- Supported the coding, testing, and documentation processes for software projects (PHP and Python).
- Performed debugging and ensured code quality adhered to specified standards.

Production Staff, GBI Jakarta

Juli 2023 - Present | South Jakarta

- Operated and set up technical equipment to ensure smooth weekly Live Streaming/Multimedia events.
- Collaborated with cross-divisional teams to achieve production targets on schedule.

EDUCATION

S1 Teknik Informatika, Universitas Esa Unggul

2024 - Present | Kebon Jeruk

GPA: 3.2. Relevant coursework: Operating System, Web Development, Database.

Rekayasa Perangkat Lunak, SMK Bina Informatika

2020 - 2023 | Bintaro

Focused on software development, database, and programming logic.

SKILLS

Programming: PHP, Python, JavaScript, HTML, CSS, C++, .Net, Java

IT & Electronics: Troubleshooting Hardware, OS Linux, Networking Essentials

Tools: VS Code, Antigravity, Git, Production/Multimedia Tools

Soft Skills: Rapid Adaptability, Technical Problem-Solving, Team Communication
